

Chronic migraine solutions

T: 1800 321 789

E: info@migrainedoctor.com.au

Migraine doctor is a specialist finder, an Australia-wide group of clinics in that use injectable therapy (anti-wrinkle with ultra-fine needles) to manage chronic migraine.

Troubled by frequent migraine?

Is it disturbing your enjoyment of life, or interfering with your work and leisure?

A migraine attack is not just a severe headache. It is a definite neurological phenomenon when one can suffer other symptoms of nausea, visual disturbance, and sensitivity to light and sound. It is a very common condition affecting some 1 in 8 women and 1 in 12 men. Most migraine sufferers are not greatly impaired suffering only a handful of attacks a year but can get on with their lives.

Chronic migraine

However, a small minority of sufferers have what is called chronic migraine. This is a more established form of the disorder, where the attacks

are more frequent and sometimes longer lasting with almost continuous daily headache.

If you have >14 days a month of headache, and at least 8 of these are migraine-like in character, then you may have chronic migraine. There are many treatments with the newest being injection therapy which can be quite effective. If you think that you may be suffering from chronic migraine, we may be able to help you.

What we treat

Our clinic can assess your headaches to see if you suffer from migraine / chronic migraine. There are many other treatments that can be used for migraine or even chronic migraine so please consult your doctor to see if these other simple measures work first.

What will happen

You will be assessed by the neurologist who will take your medical history and perform an examination. Investigations may or may not be required, and a treatment plan will be made for you.

Locations of clinics

We have several locations across Australia and have an ever increasing list of clinics.
